-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 14 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Objections***

#### **Abstract**

The abstract of the disclosure is objected to because of the length, the abstract should be in the range of 50-150 words. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### **Claims**

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims

Art Unit: 3746

are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 4-12 been renumbered 3-9.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is being rejected under 35 U.S.C. 103(a) as being unpatentable over McLoughlin et al (U.S. patent number 5,888,051) in view of Rock (U.S. patent number 4128476).

Claim 7, line 1 defines the intended use of the system and do not distinguish over the prior art. The inventor is suggested that Claim 7, line 1 does not apply any positive limitations on the claims.

McLoughlin et al disclose a fire pump that is driven by an engine. It also discloses a system for controlling the pressure output (Summary of invention first and second paragraph). The teaching of McLoughlin lacks a pressure transducer at the outlet of the pump. Rock discloses a pump (Dual chamber pump, Figure 1) having pressure-measuring transducer (46, Figure 1) at the outlet. At the time of invention it

Art Unit: 3746

would have been obvious to one in the art to apply the teachings of Rock to McLoughlin et al, as the pressure transducer can sense the output pressure and it is well known to be an accurate pressure sensing device.

***Allowable Subject Matter***

Claims 1-6 are allowed.

Claims 8-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 103(a), set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
